

DrySyn Classic

Single Position Heating Blocks

25 mL to 1000 mL

The original member of the DrySyn family, the DrySyn Classic allows the user to heat any size standard round-bottom flask from 25 mL to 1000 mL.

The base unit of the DrySyn Classic accepts a standard 1000 mL round bottom flask and allows the inserts to be used - one at a time - to adapt it to all standard flask sizes from 500 mL to 25 mL.

All single-position base units include two heat-resistant handles for safe handling when hot and adjustable feet to allow complete compatibility with any hotplate stirrer.
